

Simple + Sultry Sunless Tanning

Pre-Tan Instructions

- ☞ Mani, pedi, or color your hair before tanning.
- ☞ Waxing or other hair removal (aside from shaving) should be done 48 hours before tanning.

The Day Before:

- ☞ Exfoliate well with a clear body wash combined with raw sugar, or exfoliating mitt.
The better you exfoliate,
the better your tan goes on and stays on.
- ☞ NO cream-based wash, bar soap, or Dove Products.
 - ☞ Shave before washing your body,
to remove residue from your razor's strip.
 - ☞ Do not apply lotion after showering.
